EDUCATION

Kennesaw State University

Bachelor of Science, Computer Science

Marietta, Georgia

Expected Graduation, May 2027

- **GPA:** 3.82/4.00, *President's List (2024,2025,2026)*
- **Related Coursework:** Object-Oriented Programming with Java, Data Structure, Computer Organization & Architecture, Intro to Software Engineering, Operating System

TECHNICAL SKILLS

Languages/Frameworks: Java, Python, Kotlin, JavaScript, TypeScript, SQL, HTML/CSS

Frontend: React, Next.js, React Native, Tailwind CSS, Bootstrap, Jetpack Compose

Backend: Node.js, Express.js, Fast API, PHP, REST APIs, MongoDB,

Developer Tools: Visual Studio Code, IntelliJ, Android Studio, AWS, Git, GitHub, Postman, Docker, Cursor, Codex, Kiro,

EXPERIENCE

Ghana Airport Company/Ghana Civil Aviation Authority

Information Technology Intern

Accra, Ghana

May 2023 – August 2023

- End of internship project given to student and I built and deployed an internal React + PHP/MySQL tracking system that reduced equipment delays by 40%, with login verification, return alerts, and automated email notifications.
- Designed interactive dashboards in React for usage requests and return confirmations; maintained asset logs and supported audits/reporting.
- Provided IT support for desktops, printers, projectors, and networks; assisted with lab setup/configuration for technical training.
- Utilized React, PHP, MySQL, XAMPP, Git, and followed documentation standards for maintainability.

Kennesaw State's College of Computing and Software Engineering

Programming Tutor/Lab Assistant Team Lead

Marietta, Georgia

August 2025-Present

- Tutor students one-on-one across Java, Python, and programming fundamentals, helping them debug code, strengthen core concepts, and complete labs and assignments.
- Support 30+ students during live programming labs by troubleshooting code errors, resolving IDE setup issues, and providing real-time debugging assistance during instruction.
- Improve lab efficiency by 40% by reducing repeated student interruptions, allowing professors to stay on pace, complete planned lessons, and transition smoothly to future topics.
- Review and grade 30+ programming assignments weekly, providing feedback on logic, syntax, readability, and problem-solving approach.

PROJECTS

[Ready Up](#) | Next.js, React, TypeScript, Node.js, Express, AI APIs, MongoDB

- Built an AI-assisted productivity app with Next.js, React, TypeScript, and Node.js to detect potential tasks and events from email, calendar entries, and connected platforms
- Designed a user-approval workflow that prompts users before adding suggested tasks, reducing missed deadlines while keeping users in control.
- Developed centralized task management features for reviewing action items, organizing priorities, and tracking upcoming events from one dashboard, deployed on Vercel.

Habit Tracker with NLP Entry Support | Next.js, React, TypeScript, Node.js, Express, AI APIs, MongoDB

- Built a full-stack habit tracking app with Next.js, React, TypeScript, and Node.js that allows users to log habits using natural-language entries like "I drank 4 cups of water."
- Designed backend APIs and database models to store habit entries, track streaks, and organize daily, weekly, and monthly progress history.
- Developed dashboard features for visualizing consistency, habit completion rates, and progress trends to help users stay accountable.

AI Fraud Detection System(Hackathon) | Python, Fast API, XGBoost, scikit-learn, pandas, Git, Cursor

- Built an AI-powered fraud detection system using Python, Fast API, and XGBoost during a hackathon I implemented persistent storage with Jetpack DataStore to auto-save entries and ensure reliability across sessions.
- Designed a real-time risk scoring and adaptive verification model to balance security with user experience.
- Implemented privacy-safe data handling and transparent decision explanations for flagged transactions

LEADERSHIP, ACTIVITIES & COMMUNITY INVOLVEMENT

Color Stack

Member

Marietta, Georgia

August 2024 – Present

- Collaborate with students from diverse universities on real-world problem-solving projects, applying technical and teamwork skills to tackle practical challenges and actively engaging in workshops and seminars led by top tech companies to gain career insights.

Code Path

Student

Marietta, Georgia

June 2025 – Aug 2025

- Participated in the Code Path Technical Interview Prep I and II and was selected as a top-performing student in the program; advanced into Code Path's Career Pathways & Mentorship Program to strengthen technical and professional skills.
